

1. Team Name: Jar Files

2.

Ali (alimanzoor)

Rishi (rishisingh)

Jacob (jacobmorroni)

Absent: Nebiyu (nebiyuabr)

3.

Ali: Completed: HW0, Working on: PM0, Blocker: Group member absent

Jacob: Completed: Milestone 2 (3114), Working on: PM0, Blocker: Time management

Rishi: Completed: HW1 (2505), Working on: PM0, Blocker: Career Fair prep

4.

If we chose to code, are there specific libraries or APIs we need to use?

Will there be opportunities to receive feedback throughout the project?

If we code, how much emphasis should be placed on user design vs back-end functionality?

5.

Slack integrated focus tool to ensure teams stay on task

Reward system bot to highlight team members who contribute the most (easy)

Requirements app to list out the needs of the software project and organize them into categories such as user, backend, capabilities, etc.
